Metal Enclosed Switchgear

The recognized leader in Quick Ship Custom Built Electrical Distribution Equipment

When it comes to medium voltage switchgear, Sparkstone Electrical Group leads the way. Our switchgear is designed to serve even the most demanding market segments and undergoes rigorous testing to ensure it meets industry standards. Our switchgear provides safe distribution and power monitoring with fully integrated components, giving you peace of mind. At Sparkstone, we are committed to our manufacturing capabilities, engineering excellence, and design support, which enable us to provide standard and customized solutions to meet your needs. With quick ship delivery, you can rely on us to deliver high quality products so you can focus on what matters most - your business.

METAL ENCLOSED SWITCHGEAR

Sparkstone Electrical Group's metal enclosed switchgear provides reliable switching and fault protection for medium-voltage circuits rated up to 38kV. Built to ANSI C37.57 and IEEE C37.20.3 standards, our design includes all the required components to ensure reliability, such as protection relays, surge arresters, metering devices, CTs/PTs, CPTs, control switches, and pilot lights. Our metal enclosed switchgear offers single, multiple fused, or non-fused load interrupters.

FEATURES

- Up to 38kV
- Continuous current ratings: 600 and 1200.
- Interrupting ratings up to 40kA
- CTs, PTs and CPT Mounted in the switchgear.
- Galvanized construction for superior rust protection
- Modular design and construction
- Different sizes of construction to meet customer needs
- 14- gauge steel for strength and rigidity
